

FAKEL

CONFERENCE PROGRAM

8th RUSSIAN-GERMAN CONFERENCE
«ELECTRIC PROPULSIONS:
DEVELOPMENT AND APPLICATION
IN SPACE»

ABOUT CONFERENCE

The 8th Russian-German Conference on Electric Propulsions and their application 2020(+1) will take place from 11th to 15th of April 2021 in Kaliningrad. Both fundamental and applied research works related to the development of various types of electric propulsions and their application on board spacecraft designed for different purposes will be the topic of the conference. Near a half of all the operating or operated electric propulsions in space are made by EDB Fakel. In 2020 Fakel turned 65 years and we decided to hold a conference to celebrate this anniversary.

The Conference is intended for a contribution to the international cooperation both in industrial and scientific fields.

CO-CHAIRS

<i>Garri A. Popov</i>	Academician of the Russian Academy of Sciences, full member of the International Academy of Astronautics, Director of the Research Institute of Applied Mechanics and Electrodynamics of the Moscow Aviation Institute (RIAME MAI), Russia
<i>Prof. Peter J.Klar</i>	Prof. Dr., Director of 1 Institute of Physics, Justus-Liebig University Gießen, Germany

ORGANIZERS

<i>Michael V. Korkunov</i>	Dr., Director, JSC EDB Fakel, Russia
<i>Evgeniy V. Kosmodemyansky</i>	Dr., General designer, JSC EDB Fakel, Russia

KEY INFORMATION

Date	11 th – 15 th April, 2021
Location	Virtual
Fees	100 Euro
Website	rgcep.fakel-russia.com
Type	Full paper submission (oral presentation)

PROGRAM OF THE CONFERENCE

A total number of **59 talks** will be given by the speakers and fill out one complete conference week.

The conference agenda includes 8 Technical Sessions chaired by international experts with virtual oral presentation.

Paper topics:

- Ion thrusters;
- Stationary plasma thrusters;
- Magnetoplasmodynamic thrusters;
- Power sources and thruster-spacecraft conjunction
- Spacecraft with electric propulsions. Flight dynamics, propulsion control;
- Electric propulsion on the small, micro- and nano- satellites;
- Electric propulsions application in planets and asteroid rendezvous mission;
- Electric propulsion application for utilization of space debris.

The Conference materials, including all the presented abstracts, will be published on the conference home page and in the electronic collection.

All papers will be published in the Journal of Physics: Conference Series, IOP Publishing.

Kaliningrad time	Sunday, April 11, 2021	Monday, April 12, 2021	Tuesday, April 13, 2021	Wednesday, April 14, 2021	Thursday, April 15, 2021
10:00			Technical Session A	Technical Session B	
11:00		Conference Welcome / Plenary Session	Technical Session B	Technical Session C	Technical Session F
12:00					
13:00		Lunch & break	Lunch & break	Lunch & break Technical Session C	Lunch & break
14:00		Technical Session A	Technical Session B	Technical Session D	Technical Session G
15:00	Check-in / connection test				Technical Session H
16:00				Technical Session E	
17:00					
18:00					

Conference Welcome / Plenary Session

Moderators:	<p><u>Garri A. Popov</u> - Academician of the Russian Academy of Sciences, full member of the International Academy of Astronautics, Director of the RIAME MAI</p> <p><u>Peter J. Klar</u> - Prof. Dr., Director of 1 Institute of Physics, Justus-Liebig University Gießen, Germany</p>
-------------	--

Monday, April 12, 2021		
Time	Authors	Paper title
10:00-10:45	P. Klar G. Popov M. Korkunov E. Kosmodemiansky	Words of Welcome to the 8 th Russian German Conference on Electric propulsion
10:45-11:00	P. Klar	Recent developments in Electric Propulsion
11:00-11:15	D. Loskutov	The Unified Product and Component Portal for Space Industry
11:15-11:30	H. Leiter	Electric propulsion – Challenges for academia and industry 2021 and beyond
11:30-12:00	M. Kaplin V. Panfilov O. Mitrofanova	A brief history and an overview of EDB Fakel
12:00-12:45	V. Kim D. Merkur'ev A. Semenkin	Plasma Thrusters with closed drift of electrons: ideas and trends of development in the past and at present time
12:45-14:00	Lunch & break	

Technical Session A		Ion thrusters
Moderators:		<u>Alexander Lovtsov</u> - Dr., Head of department, Keldysh Research Center <u>Carsten Bundesmann</u> - Dr, Senior Researcher of IOM, Leipzig, Germany
		Monday, April 12, 2021
Time	Authors	Paper title
14:00-14:20	J.F. Plaza A. Post J. Toledo L. Conde J.L. Domenech-Garret J.M. Donoso	Electron emissions from NACES high performance cathode based on C12A7:e-electride material for in-space electric propulsion applications
14:20-14:40	D. Kashirin S. Semenikhin S. Khartov	Gas-Electric Isolator operation as part of a low-power Radio-Frequency Ion Thruster with a wide range of thrust control
14:40-15:00	B. T. Nauschütt P. Dietz N. G. Kleinmichel K. Holste H.J. Leiter P. J. Klar	Optical plasma diagnostics for Radio-Frequency Ion Thrusters
15:20-15:40	M. Reitemeyer D. Zschätzsch K. Holste P. J. Klar	Compatibility of the electride C12A7:e- with alternative propellants and production of thin films
15:40-16:00	Coffee break	
16:00-16:20	D. Zschätzsch M. Reitemeyer L. Chen J. F. Plaza A. Post P. J. Klar	Investigation of C12A7:E- under harsh conditions in relation to hollow cathode neutralizers
16:20-16:40	R. Akhmetzhanov A. Bogatyi E. Bogachev S. Gordeev A. Elakov D. Kashirin V. Obukhov G. Popov M. Cherkasova J. Perminova	Research Tests of Low-Power Radio-Frequency Ion Thruster with Electrodes of Ion-Extraction System made of Carbon-Carbon Composite Material based on Non-Woven Carbon Frame IPRESKON
16:40-17:00	H. Leiter et al	Commercial electric prolsusion development and production – Ariane group projects and products
17:00-17:20	S. Gordeev S. Kanev S. Khartov	Numerical mathematical model of radio-frequency Discharge in the Discharge chamber of Radio-frequency Ion Source

Tuesday, April 13, 2021		
Time	Authors	Paper title
10:00-10:20	A. Elakov E. Bogachev A. Mogulkin V. Nigmatyanov	New Features in Application of High-Dense Carbon-Carbon Composite On Non-Woven Basis In Ion Source's Ion Extraction Systems
10:20-10:40	V. Abgaryan A. Kupreeva A. Melnikov V. Nigmatyanov	Radio-frequency ion source temperature field modeling and measurements
10:40-11:00	L. Pietzonka C. Eichhorn F. Scholze D. Spemann	Laser-Induced Fluorescence Velocimetry on a Radiofrequency-Driven Ion Source
11:00-11:20	Coffee break	

Technical Session B		Stationary plasma thrusters
Moderators:		<u>Vladimir Kim - Prof. Dr., Chief researcher at RIAME</u> <u>Carsten Bundesmann - Dr, Senior Researcher of IOM,</u> <u>Leipzig, Germany</u>
Time	Authors	Paper title
11:20-11:40	F. G. Hey S. Gabriel P. Klar M. Vaupel G. Kottke G. Papathanasopoulos M. Ploncard J. Schilm F. Scortecci G. Sisinni K. Wätzig	Iodine Fed Advanced Cusp Field Thruster - iFACT
11:40-12:00	C. R. Koppel G. Quinsac	Electric Thruster Selection Criteria and Examples
12:00-12:20	A. Neumann M. Brchnelova K. Hannemann	Modeling of Cryopumps for EP Usage
12:20-14:40	P. Dietz K. Keil P.J. Sarnoch K. Holste P.J. Klar	Optimization OF AN IODINE FED RF-NEUTRALIZER
12:40-13:00	D.A. Maystrenko A.A. Shagayda A.S. Lovtsov	Probe Development for Electric Propulsion Diagnosis
13:00-14:00	Lunch & break	

Technical Session B		Stationary plasma thrusters
Moderators:		<u>Vladimir Kim - Prof. Dr., Chief researcher at RIAME</u> <u>Kristof Holste - Dr, Senior Researcher of JLU Gießen</u>
		Tuesday, April 13, 2021
Time	Authors	Paper title
14:00-14:20	F. Kiefer K. Holste C. Volkmar R. Thüringer P. J. Klar	Electromagnetic Compatibility Test Facility with Reverberation chamber for Electric Propulsion
14:20-14:40	C. Bundesmann F. Scholze C. Eichhorn D. Spemann	EP Activities at IOM in Leipzig
14:40-15:00	M. Kaplin O. Mitrofanova V. Gopanchuk M. Bernikova L. Grebenev S. Olotin E. Shiryaeva	The study of the operational process specific features in very low-power plasma accelerators
15:20-15:40	V. Kim V. Zarkharchenko V. Kalyazin D. Merkur'ev G. Popov E. Shilov	Development of the low power SPT experimental models operating with Krypton and Xenon with increased design lifetime
15:40-16:00	S. Ivakhnenko E. Vorobiov S. Shilov O. Plotnikova A. Plokhikh N. Vazhenin D. Merkurev V. Zakharchenko	Spectral-temporal characteristics of self emission from TAL in the radio-frequency band for different propellants
16:00-16:20	V. She S. Sannikova D. Gladkov Ya. Nazarova A. Nasedkin A. Berg	Mono-crystalline Lanthanum Hexaboride production peculiarities

Technical Session B		Stationary plasma thrusters
Moderators:		<u>Vladimir Kim</u> - Prof. Dr., Chief researcher at RIAME <u>Franz Georg Hey</u> – Dr, Laboratory for Enabling Technologies, Airbus
		Wednesday, April 14, 2021
Time	Authors	Paper title
10:00-10:20	A. Komarov A. Nesterenko V. Sokolov R. Podgornyh	The new possibilities to increase the SPT-140D thruster reliability
10:20-10:40	S. Shilov S. Ivahnenko E. Vorobiev D. Manegin V. Volkov S. Olotin	Parametric-test of low power thruster with anode layer on krypton
10:40-11:00	A. Plokhikh N. Vazhenin D. Merkurev V. Zakharchenko	Spectral-temporal characteristics of self emission from SPT-70 in the radio-frequency band for different propellants
11:00-11:20	R. Gnizdor A. Markov D. Semenenko O. Tolstel	Development and research of parameters and characteristics of modified SPT-70M operates on xenon and krypton
11:20 – 11:40	K. Guskov A. Rumyantsev P. Chubov A. Sinitzin	Problems of measuring propellant flow rate on the test stands and their solution
11:40-12:00	Coffee break	

Technical Session C		Magnetoplasmodynamic thrusters
Moderators:		<u>Alexander Semenkin</u> - Dr., Deputy General Director, Keldysh Research Center <u>Franz Georg Hey</u> – Dr, Laboratory for Enabling Technologies, Airbus
		Wednesday, April 14, 2021
Time	Authors	Paper title
12:00-12:20	M.Collier-Wright M.La Rosa Betancourt D.Hindley G.Hedrich A.Behnke	High-Temperature Superconductor based Power System Architectures as enablers for High Power Missions
12:20-12:40	A. Boxberger G. Herdrich A. Behnke	Assessment of Optimal Operational Regimes of Steady State Applied Field MPD Thrusters at IRS
12:40-13:00	S. Scharmann K. Holste P. J. Klar K. Hannemann A. Neumann J. Simon S. Peterschmitt D. Packan	A Thrust Balance for the Minotor ECR Thruster
13:00-13:40	Lunch & break	
13:40-14:00	G. Dyakonov N. Lyubinskaya S. Semenikhin	Influence of Discharge Channel Parameters on the APPT Performance
14:00-14:20	A. Bogatyi G. Dyakonov N. Lyubinskaya G. Popov S. Semenikhin	The Problem of optimal Discharge Energy in Ablative Pulsed Plasma Thruster

Technical Session D	Power sources and thruster-spacecraft conjunction
Moderators:	<u>Alexander Semenkin</u> - Dr., Deputy General Director, Keldysh Research Center <u>Frank Jansen</u> – Dr, Deutsches Zentrum für Luft- und Raumfahrt e.V. (DLR)

Wednesday, April 14, 2021		
Time	Authors	Paper title
14:20-14:40	A. Gafarov L. Zakharenkov E. Kuvshinova A. Lovtsov I. Ogloblina A. Semenkin A. Solodukhin	Modern trends in Spacecraft Power and Propulsion Systems and Electric Thrusters
14:40-15:00	A. Koroteev K. Gotovtsev L. Zakharenkov A. Karevskiy A. Lovtsov Yu. Oshev M. Selivanov A. Semenkin A. Solodukhin	Studies of joint operation of Electric Propulsion and Power Supply System based on closed Brayton cycle

Technical Session E	Spacecraft with electric propulsions. Flight dynamics, propulsion control
Moderators:	<u>Olga Starinova</u> - Prof. Dr., Samara University <u>Frank Jansen</u> – Dr, Deutsches Zentrum für Luft- und Raumfahrt e.V. (DLR)

		Wednesday, April 14, 2021
Time	Authors	Paper title
15:00-15:20	V. Salmin K. Petrukhina A. Kvetkin Yu. Lazarev	Approximate method for calculating Interorbital Flights of a Spacecraft with low-thrust Engines
